The Go-Giver Marriage Macmillan

Families keep the best secrets... Even from each other.

The Age of Innocence Penguin

"To say love is what makes a marriage work is like saying it takes oxygen to climb a mountain. Yes, oxygen is necessary. But not sufficient." For more than a decade, readers of the bestselling Go-Giver series have been clamoring for

a book on how to apply the philosophy at the heart of *The Go-Giver* to their personal relationships. From the original story's coauthor and his wife, a clinically trained therapist, this long-awaited sequel shows readers how to unlock a deeply satisfying, abundant relationship based on simple, everyday acts of generosity. In this new narrative, a position has opened up at the top of the multinational giant Rachel's Famous Coffee, and Tom desperately wants the job. To gain the position, he must first go through a series of interviews with the company's top executives, including its eccentric CFO, Jeremiah. Tom's wife, Tess, is facing her own challenges. The couple first met on the job, where Tess was a rising star—until her career was put on hold by the birth of a son with

special needs. The trauma and heartbreak of the past six years has put tremendous stress on their marriage. Now, Tess has learned that her best friend Amy is getting a divorce. Could she and Tom be drifting in the same direction? The thought leaves her stomach in knots. But Tom and Tess are about to have a transformational day. Over the next few hours, they will each learn from a wise cast of characters (including some surprise guests from previous *Go-Giver* stories) about five powerful secrets to building a love that lasts. Over the years since the original book's publication, the term "go-giver" has become shorthand for a defining set of values that has helped hundreds of thousands of people around the world find greater professional success. Now,

with its charming fable-within-a-parable, followed by an in-depth practical guide, *The Go-Giver Marriage* brings the personal side of *The Go-Giver* to life.

Love in the Time of Cholera (Illustrated Edition) Hamilton, ON : Burk & Associates

A Best Book of 2021 by Bloomberg BusinessWeek, Time, and The Washington Post The bestselling author of *Leonardo da Vinci* and *Steve Jobs* returns with a “compelling” (The Washington Post) account of how Nobel Prize winner Jennifer Doudna and her colleagues launched a revolution that will allow us to cure diseases, fend off viruses, and have healthier babies. When Jennifer Doudna was in sixth grade, she came home one day to find that her dad had left a paperback titled

The Double Helix on her bed. She put it aside, thinking it was one of those detective tales she loved. When she read it on a rainy Saturday, she discovered she was right, in a way. As she sped through the pages, she became enthralled by the intense drama behind the competition to discover the code of life. Even though her high school counselor told her girls didn’t become scientists, she decided she would. Driven by a passion to understand how nature works and to turn discoveries into inventions, she would help to make what the book’s author, James Watson, told her was the most important biological advance since his codiscovery of the structure of DNA. She and her collaborators turned a curiosity of nature into an invention that will transform the

human race: an easy-to-use tool that can edit DNA. Known as CRISPR, it opened a brave new world of medical miracles and moral questions. The development of CRISPR and the race to create vaccines for coronavirus will hasten our transition to the next great innovation revolution. The past half-century has been a digital age, based on the microchip, computer, and internet. Now we are entering a life-science revolution. Children who study digital coding will be joined by those who study genetic code. Should we use our new evolution-hacking powers to make us less susceptible to viruses? What a wonderful boon that would be! And what about preventing depression? Hmm...Should we allow parents, if they can afford it, to enhance the height or muscles or IQ of their kids? After helping

to discover CRISPR, Doudna became a leader in wrestling with these moral issues and, with her collaborator Emmanuelle Charpentier, won the Nobel Prize in 2020. Her story is an “enthraling detective story” (Oprah Daily) that involves the most profound wonders of nature, from the origins of life to the future of our species.

Breaker Jennifer Doudna, Gene Editing, and the Future of the Human Race "Working from research conducted over six years with hundreds of charities and donors, 'Donor-Centered Fundraising' paints a candid picture of why donors stop giving to charities they once supported, and what it will take to preserve their loyalty in the future. In clear language and backed by statistical evidence, Penelope Burk explores the pitfalls of our traditional approaches to donor communication and recognition and articulates what donors want but seldom get from the charities they support. The book features straightforward and accessible calculations that show how much money charities are failing to raise, and offers a step-by-step procedure for testing a

donor-centered alternative and gaining its acceptance in any organization."-- From publisher description.

As a teenager, he channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics. But when World War II began, the athlete became an airman, embarking on a journey that led to a doomed flight on a May afternoon in 1943. When his Army Air Forces bomber crashed into the Pacific Ocean, against all odds, Zamperini survived, adrift on a

foundering life raft. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, thirst and starvation, enemy aircraft, and, beyond, a trial even greater. Driven to the limits of endurance, Zamperini would answer desperation with ingenuity; suffering with hope, resolve, and humor; brutality with rebellion. His fate, whether triumph or tragedy, would be suspended on the fraying wire of his will. The senator from Missouri shares her "straightforward, plainspoken, and at once deeply personal and thoroughly political" (Publishers Weekly) story of embracing her ambition, surviving sexism, making a family, losing a husband, outsmarting her enemies—and finding joy along the way. Claire McCaskill grew up in a political family, but not at a time that welcomed women with big plans. She earned a law degree

and paid her way through school by working as a waitress. By 1982 Claire had set her sights on the Missouri House of Representatives. That door was slammed in her face, but Claire always kept pushing—first as a prosecutor of arsonists and rapists and then all the way to the door of a cabal of Missouri politicians, who had secret meetings to block her legislation. In this candid, lively, and forthright memoir, Senator McCaskill describes her uphill battle to become who she is today, from her failed first marriage to a Kansas City car dealer—the father of her three children—to her current marriage to a Missouri businessman whom she describes as "a life partner." She depicts her ups and downs with the Clintons, her long-shot reelection as senator after

secretly helping to nominate a right-wing extremist as her opponent, and the fun of joining the growing bipartisan sisterhood in the Senate.

Unconventional, unsparing in its honesty, full of sharp humor and practical wisdom, and rousing in its defense of female ambition, "Plenty Ladylike is a powerful, unapologetic primer on the successful exercise of real power and what it takes to get it, keep it, and use it. This is a brilliant memoir that nearly explodes with encouragement for women on how to achieve their dreams" (Sheryl Sandberg, Facebook COO and author of Lean In).

Nonprofit leadership is messy Nonprofits leaders are optimistic by nature. They believe with time, energy, smarts, strategy and sheer will, they can change the world. But as staff or board leader, you know nonprofits present unique challenges. Too many cooks, not enough money, an abundance of passion. It's enough to make you feel overwhelmed and alone. The people you help need you

to be successful. But there are so many obstacles: a micromanaging board that doesn't understand its true role; insufficient fundraising and donors who make unreasonable demands; unclear and inconsistent messaging and marketing; a leader who's a star in her sector but a difficult boss... And yet, many nonprofits do thrive. Joan Garry's *Guide to Nonprofit Leadership* will show you how to do just that. Funny, honest, intensely actionable, and based on her decades of experience, this is the book Joan Garry wishes she had when she led GLAAD out of a financial crisis in 1997. Joan will teach you how to: Build a powerhouse board Create an impressive and sustainable fundraising program Become seen as a 'workplace of choice' Be a compelling public face of your

nonprofit This book will renew your passion for your mission and organization, and help you make a bigger difference in the world.

This book will tell all you need to know about British English spelling. It's a reference work intended for anyone interested in the English language, especially those who teach it, whatever the age or mother tongue of their students. It will be particularly useful to those wishing to produce well-designed

materials for teaching initial literacy via phonics, for teaching English as a foreign or second language, and for teacher training. English spelling is notoriously complicated and difficult to learn; it is correctly described as much less regular and predictable than any other alphabetic orthography. However, there is more regularity in the English spelling system than is generally appreciated. This book provides, for the first time, a thorough account of the whole complex system. It does so by describing how phonemes relate to graphemes and vice versa. It enables searches for particular words, so that one can easily find, not the meanings or pronunciations of words, but the other words with which those with unusual phoneme-grapheme/grapheme-phoneme

correspondences keep company. Other unique features of this book include teacher-friendly lists of correspondences and various regularities not described by previous authorities, for example the strong tendency for the letter-name vowel phonemes (the names of the letters) to be spelt with those single letters in non-final syllables.

For the first time in history, eradicating world poverty is within our reach. Yet around the world, a billion people struggle to live each day on less than many of us pay for bottled water. In *The Life You Can Save*, Peter Singer uses

ethical arguments, illuminating examples, and case studies of charitable giving to show that our current response to world poverty is not only insufficient but morally indefensible. *The Life You Can Save* teaches us to be a part of the solution, helping others as we help ourselves.
